Assignment 1

Mümin Can Yılmaz

21228932

1.Introduction

In this assignment we were expected to develop a simple web application. Servlet and JSP technologies had to be used.

2.Diagrams

With the application i developed, users can create account, login, log out and manipulate records. There are only two classes: user and record. User class hold the username and password information about users. Record class hold the informations about records.

I developed my applciation using editor Eclipse for Java EE. As server, i used tomcat 9.
